

Color Our World

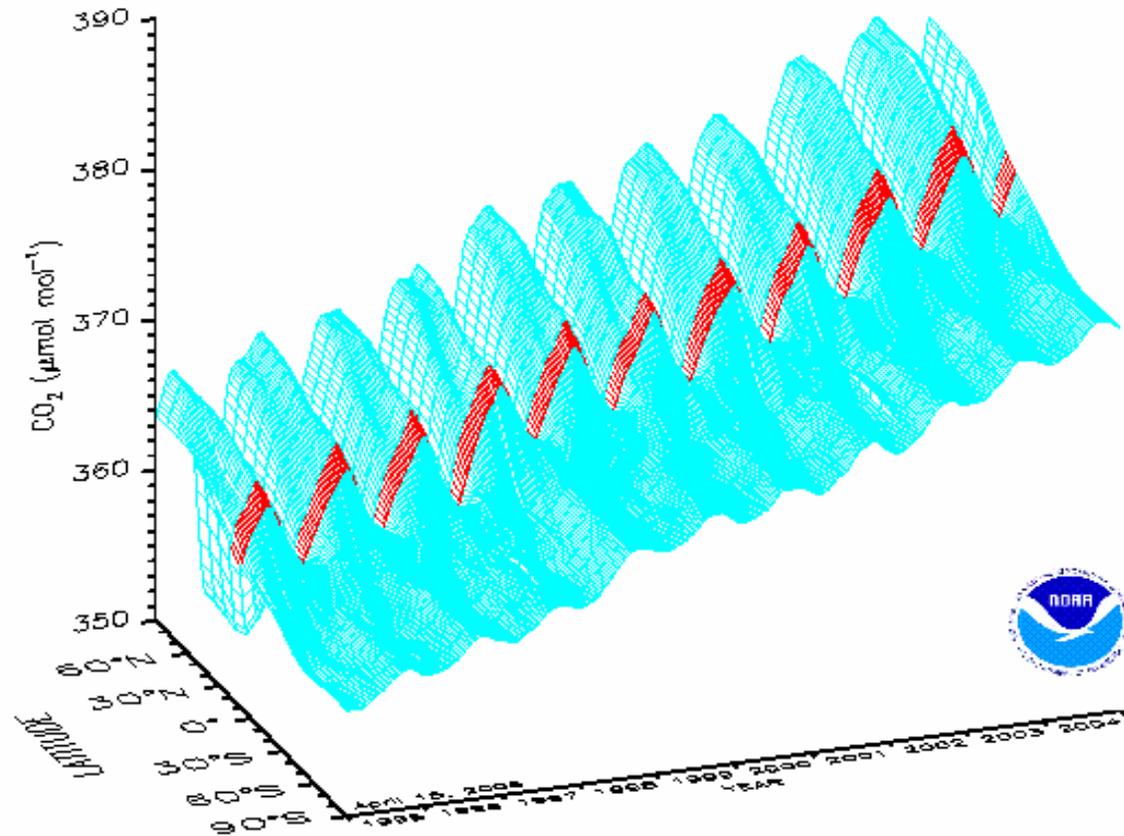

1. Red 2. Green 3. Blue 4. Purple

Color the diagram according to the key listed above. When done turn to the next page for more information.

Note does the northern or southern hemisphere have more red areas?

Global Distribution of Carbon Dioxide

[10° latitude band in which Mauna Loa, Hawaii, United States resides is highlighted]

The map shows red area industrialized area, green non-industrialized areas (forest, deserts), blue is the oceans, & seas, purple is ice. The plot above shows higher concentrations of carbon dioxide in the northern hemisphere due to more land with industrialized cities
