

Two Days Before the Mast*

Why?!

"Mr. Osborne, may I be excused? My brain is full."

Our scientific nature is to be skeptical....

of the validity of our hypotheses, our data, our tools..

CAUSE
EFFECT

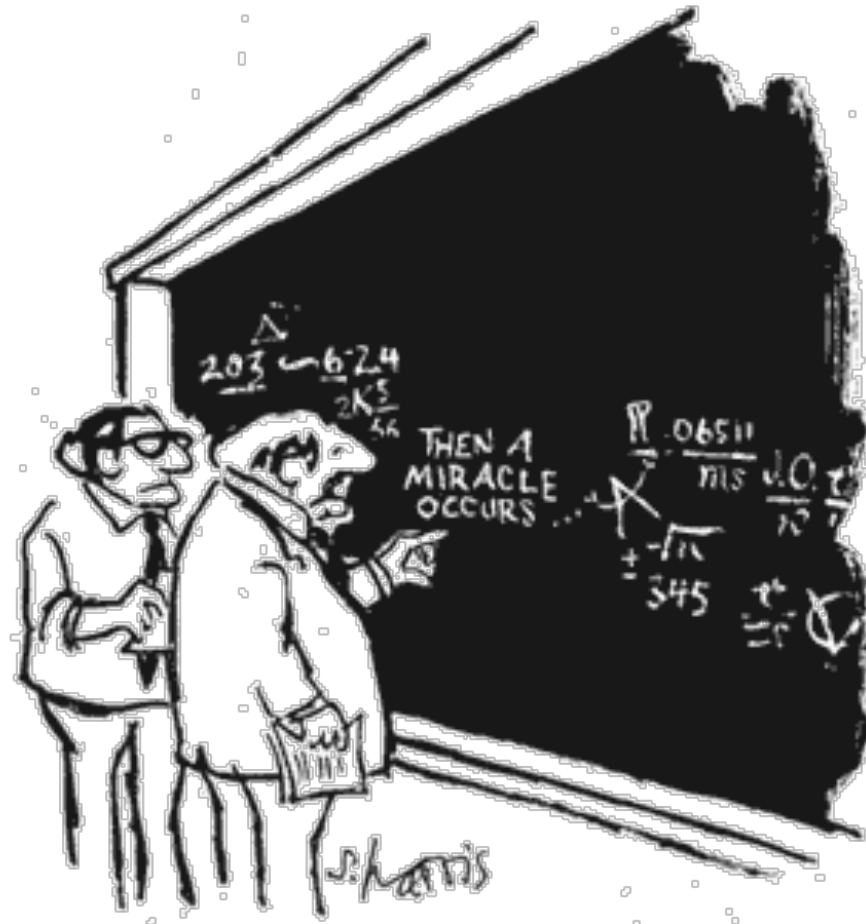

The logo features the words "CAUSE" and "EFFECT" in a bold, blue, serif font with a 3D shadow effect. A large, grey ampersand (&) is positioned between the two words, overlapping them. A horizontal grey line runs across the middle of the ampersand, separating the two words.

Knowing the Cause(s) is Important

Diagnosis ----- Prognosis

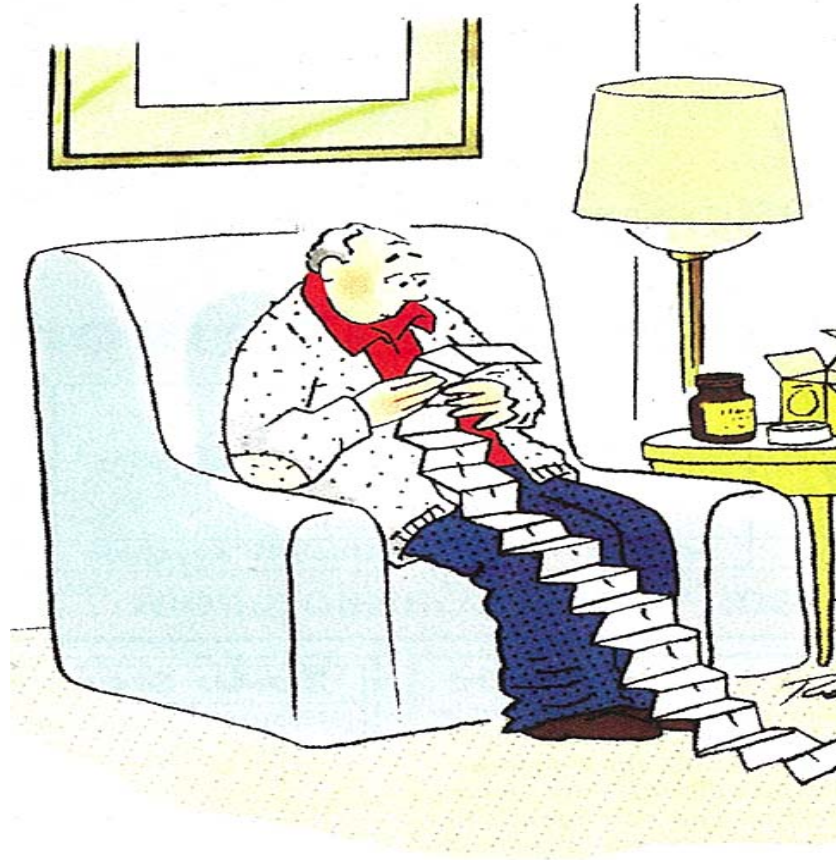

Diagnosis can be Complicated

"I THINK YOU SHOULD BE MORE EXPLICIT HERE IN STEP TWO."

Explaining our Methods can be...*Challenging*

**“Warning. Reading all this information about
medicine may cause drowsiness.”**

Explaining our Diagnosis can be ... challenging

**"What do you mean 'it just happened'?
Didn't we discuss cause and effect?"**

**Explaining What the Diagnosis Means
for the Prognosis is Critical**

Prediction for Day3

The ultimate prediction ...

I predict that in future,
Australia will suffer
extreme heat, drought
and bush fires!

... that is, of course, when it
is not busy freezing, raining
and flooding!
